STOEGER X5

The X5 is a great entry-level air rifle with style, performance and power. The lightweight, X5 single-stroke, spring-piston rifle blasts .177 alloy pellets at 800 feet per second. And the ergonomic cocking grip lets you fully charge the rifle with less effort, shot after shot.

The rifled steel barrel of the X5 airgun provides accuracy and years of service. The X5 comes standard with front and adjustable rear sights with fibre-optic insertsâ€”green front and two-dot, red rearâ€”to make target acquisition easy in any light or weather conditions.

All X5 receivers come with integral dovetail scope rails.

The X5 is mounted in a hardwood, Monte Carlo-style stock for quick target acquisition. The raised, ambidextrous cheek-piece lets you shoot comfortably, regardless of hand preference. A rubber butt-pad is standard for a solid shoulder mount. For added security and control, the X5 has an automatic, ambidextrous safety mounted on the back of the receiver.

Add greater precision to your shooting with a factory-installed, 4x32 power riflescope on the X5 Combo. The X5 air rifle is the ideal airgun for target shooting, plinking and eradicating small pests.
